

Process & Decision Documentation

Project/Assignment Decisions

I learned how to upload my code to Github during class using Visual Studio Code. The process was confusing, since while I have used GitHub before, I never used it to this extent, and there was a learning curve. I got a bit lost during the process and had trouble linking my VSC and Github, but my friend helped me and explained where I had gone wrong. I managed to get it working and even changed the background colour of my Sketch.

GenAI Documentation

No GenAI was used for this Side Quest.
